# INESTA COMBI COMPACTOR

**INESTA compactors ensure a safer and healthier living environment today and in the future.**

High-quality INESTA compactors offer efficient and economical waste disposal solutions even in demanding conditions. INESTA compactors are user friendly and simple to operate, this makes them an excellent choice in locations that produce large amounts of waste.

The pressing unit of the INESTA compactor is fixed to the container, this hygienic, space-saving solution is ideally suited for:

- Food processing factories, hospitals, hotels, shopping centres and retail parks, universities, commercial properties, general manufacturing site.

INESTA Consulting and Trading compactors have high compression ration. By compacting waste material in the INESTA compactor, the volume of the waste material is significantly reduced.

# INESTA COMBI COMPACTOR

INESTA Combi compactor is an effective solution to be used for carton/cardboard/paper, metal-plastic packaging material:

Key features:

- INESTA Combi compactor compresses waste horizontally;
- An indicator of a compactor's fullness: 80 and 100%;
- INESTA Combi compactor can be both skip-loading and hook-loading type compactors, according to the customer needs;
- CE compliant;
- INESTA Consulting and Trading SIA manufacture their compactors using high-grade steel.

## Technical Specification

Container volume	5 m <sup>3</sup> – 20 m <sup>3</sup>
Compacting force	180 kN (18 tones) or 280 kN (28 tones)
Steel grade	S355
Hydraulic cylinders	2 pieces
Electrical motor	5.5 kW
Electrical supply	1 phase or 3 phase
Wheels	back corner wheels
Continues loading	suitable

# INESTA BIO COMBI COMPACTOR

INESTA Bio Combi compactor is an ideal compactor to be used for wet waste material:

**Key features:**

- INESTA Bio compactor has a pendulum type ram with enclosed hydraulic cylinders (2 pieces) that make INESTA Bio compactor an excellent solution for industries where waste with high liquid content is generated.
- The design of the pendulum ram ensures that waste dropped into the filling area of the bio compactor does not get into a contact with the hydraulic cylinders;
- Such solution excludes the possibility of waste being collected under or/and behind the pressing ram, ensuring compactor's high durability long life and low service cost;
- 100% leak-proof design;
- An indicator of a compactor's fullness: 80 and 100%;
- INESTA Bio compactor can be both skip-loading and hook-loading type compactors, according to the customer needs;
- CE compliant;
- INESTA Consulting and Trading SIA manufacture their compactors using high-grade steel.

## Technical Specification

Container volume	5 m <sup>3</sup> – 14 m <sup>3</sup>
Compacting force	300 kN (30 tones)
Steel grade	S355
Hydraulic cylinders	2 pieces
Electrical motor	5.5 kW
Electrical supply	1 phase or 3 phase
Wheels	back corner wheels
Continues loading	suitable
